R Markdown

Figure 1: Simulated dataset with crossloadings on the 'history' indicator. This is the data-generating model.

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.

Figure 2: Model specified by the Jedi council. The incorrectly specified paths are thicker and missing paths are shown as dotted lines.
